

# NEVADA IRRIGATION DISTRICT

IS PROUD TO PRESENT ...

A NEW ALL DAY CLASS ON AG IRRIGATION

- How much water do I need for irrigated pastures, orchards, and vineyards?
- What is a Miner's Inch? Why is it important? If 1 inch is good, is 2 inches better?
- How many acres of pasture, orchard, and vineyard will a Miner's Inch irrigate?
- How do I evaluate my own irrigation system for uniformity and application rates?
- When should I irrigate and how much?
- Are there tools for measuring soil moisture levels?
- Does a pond or holding tank make sense in an irrigation design?
- Why does water pressure matter so much?

## Key Benefits to this class:

Save on power costs

Higher crop yields

Beautify your property

Put more ground into production

Weed control

Water conservation

Protect native Oaks

Add value to property

**UPCOMING DATES:      APRIL 25, 2009 - SATURDAY, PLACER COUNTY**
