## POLICY MANUAL

POLICY TITLE: Standing Committees

POLICY NUMBER: 5300

5300.1 Purpose: To establish the roles and responsibilities of the District's standing committees and ongoing Ad Hoc committees. Much of the District's work is accomplished through its committees. These committees are designed to undertake work delegated by the Board in an effort to streamline the approval process. By way of their work, committees have the ability to enhance productivity and expand transparency regarding the District's decision-making processes.

By utilizing a subdivision of the Board to work with staff on various initiatives, the District can ensure that those initiatives are being developed routinely with direction from a subdivision of the Board. It further ensures that Items brought before the Board have the necessary quality, consistency, and continuity to ease decision making when those initiatives are considered by the full Board.

Transparency of decision-making is an important function of the Committees as they are an additional working space for the District. These committees provide an opportunity for the public to observe and provide input into the Districts' operations. Committees also offer the opportunity for the public-at-large to better understand District processes and decision-making metrics.

5300.2 Assignment: The Board President will prepare the assignments consistent with this policy to be approved by the Board at the first meeting in January.
